

## Press Release

### **EXCITE MEDICAL CORPORATION ANNOUNCES THEIR SERVICING OF THE DRX MACHINES!**

Excite Medical Corp. now services the DRX9000, DRX9000C and the DRX 9500.

**FOR IMMEDIATE RELEASE - Tampa, FL September 2, 2010:** Excite Medical Corp. is now your go to company for complete support and service on the DRX9000, DRX9000C and DRX9500 machines. Excite Medical is the only factory authorized DRX service center in North America.

We are also proud to announce the addition of the most talented and experienced technicians that have ever worked on and serviced the DRX systems. Erik, Don, Harlon, and Joshua are assets to Excite Medical. Our senior technicians have over 7 years experience individually. Combined, our technicians have completed over a thousand service calls. Our technical phone support specialist is the most experienced DRX technician in the country. There are countless issues he has been able to resolve over the phone. Most companies would have to fly a technician to your practice to fix.

We are the only company in the industry with a complete parts inventory! While other companies rely on salvaging parts from old systems to repair yours, we have all the parts you need new in inventory. As an added bonus, all of our new parts come with a one year warranty.

When it comes to non-surgical spinal decompression, we specialize in the DRX9000 family of systems. We are the only company that has an engineer that was part of the engineering team that worked on the design modifications for the DRX9000, DRX9000C and DRX9500. This is critical in designing new specifications for parts that have or will become obsolete.
